SUPPLEMENTARY INFORMATION:

Regulations Schedule for 2021

On October 9, 2020, we published in the **Federal Register** (85 FR 64097) a proposal to amend title 50 of the Code of Federal Regulations (CFR) at part 20. The proposal provided a background and overview of the migratory bird

hunting regulations process, and addressed the establishment of seasons, limits, and other regulations for hunting migratory game birds under §§ 20.101 through 20.107, 20.109, and 20.110 of subpart K. Major steps in the 2021-22 regulatory cycle relating to open public meetings and **Federal Register** notifications were illustrated in the diagram at the end of the October 9, 2020, proposed rule. For this regulatory cycle, we combined the elements described in that diagram as "Supplemental Proposals" with the one described as "Proposed Season Frameworks."

We provided the meeting dates and locations for the Service Regulations Committee (SRC) and Flyway Council meetings on Flyway calendars posted on our website at <https://www.fws.gov/birds/management/flyways.php>. On October 20-21, 2020, we held open meetings with the Flyway Council Consultants, at which the participants reviewed information on the current status of migratory game birds and developed recommendations for the 2021-22 regulations for these species. The October 9, 2020, proposed rule provided detailed information on the proposed 2021-22 regulatory schedule and announced the SRC meetings.

On February 22, 2021, we published in the **Federal Register** (86 FR 10622) the proposed frameworks for the 2021-22 season migratory bird hunting regulations. On July 16, 2021, we published in the **Federal Register** (86 FR 37854) the final frameworks for migratory game bird hunting regulations, from which State wildlife conservation agency officials selected seasons, hours, areas, and limits for hunting migratory birds during the 2021-22 season.

The final rule described here is the final in the series of proposed, supplemental, and final rulemaking documents for migratory game bird hunting regulations for the 2021-22 season, and deals specifically with amending subpart K of 50 CFR part 20. It sets hunting seasons, hours, areas, and limits for migratory game bird species. This final rule is the culmination of the annual rulemaking process allowing migratory game bird hunting, which started with the October 9, 2020, proposed rule. As discussed elsewhere in this document, we supplemented that proposal on February 22, 2021, and published final season frameworks on July 16, 2021, that provided the season selection criteria from which the States selected these seasons. This final rule sets the migratory game bird hunting seasons based on that input from the States. We previously addressed all

comments in the July 16 **Federal Register** (86 FR 37854).

Required Determinations

National Environmental Policy Act (NEPA) Consideration

The programmatic document, “Second Final Supplemental Environmental Impact Statement: Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (EIS 20130139),” filed with the Environmental Protection Agency (EPA) on May 24, 2013, addresses NEPA (42 U.S.C. 4321 *et seq.*) compliance by the Service for issuance of the annual framework regulations for hunting of migratory game bird species. We published a notice of availability in the **Federal Register** on May 31, 2013 (78 FR 32686), and our Record of Decision on July 26, 2013 (78 FR 45376). We also address NEPA compliance for waterfowl hunting frameworks through the annual preparation of separate environmental assessments, the most recent being “Duck Hunting Regulations for 2021–22,” with its corresponding March 2021, finding of no significant impact. The programmatic document, as well as the separate environmental assessment, is available on our website at <https://www.fws.gov/birds/index.php>.

Endangered Species Act Consideration

Section 7 of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), provides that the Secretary shall insure that any action authorized, funded, or carried out is not likely to jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of critical habitat. Consequently, we conducted formal consultations to ensure that actions resulting from these regulations would not likely jeopardize the continued existence of endangered or threatened species or result in the destruction or adverse modification of their critical habitat. Findings from these consultations are included in a biological opinion, which concluded that the regulations are not likely to jeopardize the continued existence of any endangered or threatened species. Additionally, these findings may have caused modification of some regulatory measures previously proposed, and the final frameworks (86 FR 37854; July 16, 2021) reflect any such modifications. The biological opinion is available from <http://www.regulations.gov> at Docket No. FWS–HQ–MB–2020–0032.

Regulatory Planning and Review (Executive Orders 12866 and 13563)

E.O. 12866 provides that the Office of Information and Regulatory Affairs (OIRA) will review all significant rules. OIRA has reviewed this rule and has determined that this rule is significant because it will have an annual effect of \$100 million or more on the economy.

E.O. 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation’s regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. The Executive order directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this rule in a manner consistent with these requirements.

An economic analysis was prepared for the 2021–22 season. This analysis was based on data from the 2016 National Survey of Fishing, Hunting, and Wildlife-Associated Recreation (National Survey), the most recent year for which data are available (see discussion under *Regulatory Flexibility Act*, below). This analysis estimated consumer surplus for three alternatives for duck hunting (estimates for other species are not quantified due to lack of data). The alternatives are (1) issue restrictive regulations allowing fewer days than those issued during the 2019–20 season, (2) issue moderate regulations allowing more days than those in alternative 1, and (3) issue liberal regulations similar to the regulations in the 2020–21 season. For the 2020–21 season, we chose Alternative 3, with an estimated consumer surplus across all flyways of \$270–\$358 million with a mid-point estimate of \$314 million. We also chose alternative 3 for the 2009–10 through 2020–21 seasons. The 2021–22 analysis is part of the record for this rule and is available at <http://www.regulations.gov> at Docket No. FWS–HQ–MB–2020–0032.

Regulatory Flexibility Act

The annual migratory bird hunting regulations have a significant economic impact on substantial numbers of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). We analyzed

the economic impacts of the annual hunting regulations on small business entities. This analysis is updated annually. The primary source of information about hunter expenditures for migratory game bird hunting is the National Survey, which is generally conducted at 5-year intervals. The 2021 analysis is based on the 2016 National Survey and the U.S. Department of Commerce’s County Business Patterns, from which it is estimated that migratory bird hunters will spend approximately \$2.2 billion at small businesses in 2021. The analysis is available from <http://www.regulations.gov> at Docket No. FWS–HQ–MB–2020–0032.

Small Business Regulatory Enforcement Fairness Act

This final rule is a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. For the reasons outlined above, this rule will have an annual effect on the economy of \$100 million or more. However, because this rule establishes regulations for hunting seasons, we do not plan to defer the effective date under the exemption contained in 5 U.S.C. 808(1).

Paperwork Reduction Act

This rule does not contain any new collection of information that requires approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. OMB has previously approved the information collection requirements associated with migratory bird surveys and the procedures for establishing annual migratory bird hunting seasons under the following OMB control numbers:

- 1018–0019, “North American Woodcock Singing Ground Survey” (expires 02/29/2024).
- 1018–0023, “Migratory Bird Surveys, 50 CFR 20.20” (expires 04/30/2023). Includes Migratory Bird Harvest Information Program, Migratory Bird Hunter Surveys, Sandhill Crane Survey, and Parts Collection Survey.
- 1018–0171, “Establishment of Annual Migratory Bird Hunting Seasons, 50 CFR part 20” (expires 02/29/2024).

Unfunded Mandates Reform Act

We have determined and certify, in compliance with the requirements of the Unfunded Mandates Reform Act, 2 U.S.C. 1502 *et seq.*, that this rulemaking

will not impose a cost of \$100 million or more in any given year on local or State government or private entities. Therefore, this rule is not a “significant regulatory action” under the Unfunded Mandates Reform Act.

Civil Justice Reform—Executive Order 12988

The Department, in promulgating this rule, has determined that this rule will not unduly burden the judicial system and that it meets the requirements of sections 3(a) and 3(b)(2) of E.O. 12988.

Takings Implication Assessment

In accordance with E.O. 12630, this rule, authorized by the Migratory Bird Treaty Act, does not have significant takings implications and does not affect any constitutionally protected property rights. This rule will not result in the physical occupancy of property, the physical invasion of property, or the regulatory taking of any property. In fact, this rule will allow hunters to exercise otherwise unavailable privileges and, therefore, reduce restrictions on the use of private and public property.

Energy Effects—Executive Order 13211

E.O. 13211 requires agencies to prepare Statements of Energy Effects when undertaking certain actions. While this rule is a significant regulatory action under E.O. 12866, it is not expected to adversely affect energy supplies, distribution, or use. Therefore, this action is not a significant energy action and no Statement of Energy Effects is required.

Government-to-Government Relationship With Tribes

In accordance with the President’s memorandum of April 29, 1994, “Government-to-Government Relations with Native American Tribal Governments” (59 FR 22951), E.O. 13175, and 512 DM 2, we have evaluated possible effects on federally recognized Indian Tribes and have determined that there are no effects on Indian trust resources. We solicited proposals for special migratory bird hunting regulations for certain Tribes on Federal Indian reservations, off-reservation trust lands, and ceded lands for the 2021–22 migratory bird hunting season in the October 9, 2020, proposed rule (85 FR 64097). The resulting proposals were contained in a separate proposed rule published on May 4, 2021 (86 FR 23641). By virtue of these actions, we have consulted with Tribes affected by this rule.

Federalism Effects

Due to the migratory nature of certain species of birds, the Federal Government has been given responsibility over these species by the Migratory Bird Treaty Act. We annually prescribe frameworks from which the States make selections regarding the hunting of migratory birds, and we employ guidelines to establish special regulations on Federal Indian reservations and ceded lands. This process preserves the ability of the States and Tribes to determine which seasons meet their individual needs. Any State or Tribe may be more restrictive than the Federal frameworks at any time. The frameworks are developed in a cooperative process with the States and the Flyway Councils. This process allows States to participate in the development of frameworks from which they will make selections, thereby having an influence on their own regulations. These rules do not have a substantial direct effect on fiscal capacity, change the roles or responsibilities of Federal or State governments, or intrude on State policy or administration. Therefore, in accordance with E.O. 13132, these regulations do not have significant federalism effects and do not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

Review of Public Comments

The October 9, 2020, proposed rulemaking (85 FR 64097) opened the public comment period for 2021–22 migratory game bird hunting regulations. We previously addressed all comments in a July 16, 2021, **Federal Register** publication (86 FR 37854).

Regulations Promulgation

The rulemaking process for migratory game bird hunting, by its nature, operates under a time constraint as seasons must be established each year or hunting seasons remain closed. However, we intend that the public be provided extensive opportunity for public input and involvement in compliance with Administrative Procedure Act (5 U.S.C. subchapter II) requirements. Thus, when the preliminary proposed rulemaking was published, we established what we concluded were the longest periods possible for public comment and the most opportunities for public involvement. We also provided notification of our participation in multiple Flyway Council meetings, opportunities for additional public review and comment on all Flyway

Council proposals for regulatory change, and opportunities for additional public review during the SRC meeting. Therefore, we conclude that sufficient public notice and opportunity for involvement have been given to affected persons.

Further, States need sufficient time to communicate these season selections to their affected publics, and to establish and publicize the necessary regulations and procedures to implement these seasons. Thus, we find that “good cause” exists, within the terms of 5 U.S.C. 553(d)(3) of the Administrative Procedure Act, and therefore, under authority of the Migratory Bird Treaty Act (July 3, 1918), as amended (16 U.S.C. 703–711), these regulations will take effect less than 30 days after publication. Accordingly, with each conservation agency having had an opportunity to participate in selecting the hunting seasons desired for its State or Territory on those species of migratory birds for which open seasons are now prescribed, and consideration having been given to all other relevant matters presented, certain sections of title 50, chapter I, subchapter B, part 20, subpart K, are hereby amended as set forth below.

■ 8. Section 20.107 is revised to read as follows:

§ 20.107 Seasons, limits, and shooting hours for swans.

Subject to the applicable provisions of the preceding sections of this part, areas open to hunting, respective open seasons (dates inclusive), shooting and hawking hours, and daily bag and possession limits on the species designated in this section are as follows:

Shooting hours are one-half hour before sunrise until sunset, except as otherwise restricted by State

regulations. Hunting is by State permit only.

Federally authorized, State-issued permits are issued to individuals, and only the individual whose name and address appears on the permit at the time of issuance is authorized to take swans at the level allowed by the permit, in accordance with provisions of both Federal and State regulations governing the hunting season. The permit must be carried by the permittee when exercising its provisions and must be presented to any law enforcement officer upon request. The permit is not transferable or assignable to another

individual, and may not be sold, bartered, traded, or otherwise provided to another person. If the permit is altered or defaced in any way, the permit becomes invalid.

Note: Successful permittees must immediately validate their harvest by that method required in State regulations.

■ 9. Section 20.109 is revised to read as follows:

§ 20.109 Extended seasons, limits, and hours for taking migratory game birds by falconry.

Subject to the applicable provisions of the preceding sections of this part, areas open to hunting, respective open seasons (dates inclusive), hawking hours, and daily bag and possession limits for the species designated in this section are prescribed as follows:

Hawking hours are one-half hour before sunrise until sunset except as

otherwise restricted by State regulations.

Area descriptions were published in the July 16, 2021, **Federal Register** (86 FR 37854).

Limits: The daily bag limit may include no more than 3 migratory game birds in the aggregate. The possession limit is three times the daily bag limit. These limits apply to falconry during both regular hunting seasons and extended falconry seasons, unless further restricted by State regulations. The falconry bag and possession limits are not in addition to regular season limits. Unless otherwise specified,

extended falconry for ducks does not include sea ducks within the special sea duck areas.

Although many States permit falconry during the gun seasons, only extended falconry seasons are shown below. Please consult State regulations for details.

National Oceanic and Atmospheric Administration

50 CFR Part 648

RIN 0648–XB238

Fisheries of the Northeastern United States; Northeast Skate Complex; Rescission of Control Dates

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of rescinded control dates.

SUMMARY: NMFS announces the rescission of the July 30, 2009, and March 31, 2014, skate wing and bait fishery control dates. The New England Fishery Management Council has decided to discontinue development of limited access alternatives for both the skate wing and skate bait fisheries as part of Amendment 5 to the Northeast Skate Complex Fishery Management Plan. The Council also stated that the existing control dates for each sector of the fishery are too outdated to be used should the Council reconsider limited access for the skate fisheries in the future and has requested that NMFS rescind both control dates. This notification informs stakeholders and the public of this decision, and that July 30, 2009, and March 31, 2014, are no longer considered dates for entry into the bait and skate wing fisheries, respectively.

DATES: The rescission of skate wing and bait fishery control dates is effective August 31, 2021.

FOR FURTHER INFORMATION CONTACT: Cynthia Ferrio, Fishery Policy Analyst, (978) 281–9180.

SUPPLEMENTARY INFORMATION: The New England Fishery Management Council manages a complex of seven skate species (barndoor, clearnose, little, rosette, smooth, thorny, and winter skate) through the Northeast Skate Complex Fishery Management Plan

(FMP). Under this FMP, skates are harvested and managed within two targeted fishery sectors, one for use as food (the wing fishery) and one for use as bait in other fisheries (the bait fishery). Currently, all skate permits are open access and may be obtained anyone with a valid commercial operator's permit.

NMFS announced a control date of July 30, 2009, for the bait sector of the fishery (74 FR 37977; July 30, 2009) during the initial development of Amendment 3 to the Skate FMP. At that time, the Council was concerned about the possibility of increased effort by new entrants into the skate bait fishery, and therefore, considered developing a limited access program for that sector only. The notification announcing the control date intended to promote public awareness of potential eligibility criteria for access to the fishery and possible implementation of a limited-entry management plan. Although Amendment 3 (75 FR 34049; June 16, 2010) did not end up establishing limited entry for the bait fishery, the July 30, 2009 control date remained on record for future use.

On March 31, 2014, NMFS announced a separate control date for the wing fishery at the Council's request (79 FR 18002; March 31, 2014). This notification was not tied to a specific regulatory action or amendment at the time, but was intended as a preliminary step toward preparing for a limited entry program for the overall skate fishery and announcing these possibilities to the public.

In 2016, the Council began developing Amendment 5 to the Skate FMP, which included consideration of limited access for both the bait and wing sectors of the fishery. However, at its meeting in April 2021, the Council decided to discontinue development of all limited access alternatives in this amendment in favor of other management strategies to address latent effort. In conjunction with that decision, the Council also determined that both control dates for the wing and bait skate fisheries are outdated should a limited access program be reconsidered in the future. As a result, at its following meeting in June 2021, the Council voted to request NMFS rescind the existing control dates for the skate FMP. Therefore, NMFS

announces the rescission of the July 30, 2009, control date with respect to the skate bait fishery; and the March 31, 2014, control date with respect to the skate wing fishery.

The Council decided to not develop a limited entry management system for the Skate FMP in Amendment 5. However, if the Council chooses to pursue limited access in the future, it will consider new control dates for these fisheries.

Fisheries of the Northeastern United States; Atlantic Mackerel, Squid, and Butterfish Fishery; 2021 *Illex* Squid Quota Harvested

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; reduction of possession limit.

SUMMARY: Federal *Illex* squid vessel permit holders are prohibited from fishing for, catching, possessing, transferring or landing more than 10,000 lb (4,535 kg) of *Illex* squid per trip, and from landing *Illex* squid more than once per calendar day. This prohibition is required when NMFS projects that 94 percent of the 2021 annual catch limit has been caught. This action is intended to prevent over-harvest of *Illex* squid for the fishing year.

DATES: Effective 0001 hr local time, August 30, 2021, through December 31, 2021.
